Hiring Manager

Siemens Gamesa

Subject: Application for a Role in Intelligent Automation / AI-Driven Engineering Solutions

Dear Hiring Manager,

I am writing to express my strong interest in a role related to intelligent automation or AI/ML-driven engineering solutions at Siemens Gamesa. As a final-year B.Tech student specializing in Data Science at Maharishi Markandeshwar University, I bring a solid foundation in AI/ML, full-stack development, and workflow automation — all aligned with your mission to lead the global energy transition.

During my internship at Alpha Intern Pvt. Ltd., I worked on automation pipelines that reduced issue resolution time by 25%, showcasing my ability to apply data-driven thinking to real-world problems. My academic and project experience includes developing an AI-powered nutrition analyzer (NutriScan) and a Resume Matcher using BERT, both of which focus on intelligent data extraction, processing, and actionable automation. These projects demonstrate not only my technical capabilities but also a keen eye for solving practical, scalable problems.

What excites me most about Siemens Gamesa is your vision for a sustainable future, driven by innovation and intelligent systems. I am particularly inspired by your focus on automation in renewable energy solutions, and I am eager to contribute my technical skillset — especially in Python, ML, FastAPI, and cloud tools like GCP — to help optimize workflows and enhance system efficiencies.

I believe that my ability to work across diverse tech stacks, combined with strong teamwork and a passion for innovation, make me a strong fit for your team. I would welcome the opportunity to further discuss how my background aligns with your goals and contribute meaningfully to Siemens Gamesa's forward-looking initiatives.

Thank you for considering my application. I look forward to the opportunity to speak with you.

Warm regards,

Ajaj Ali
